PROFILE

Senior Front-End Engineer with **6+ years** building **government, fintech, HR and enterprise products**. I own front-end architecture end to end: design systems and tokens, **Signals-based Angular with RxJS**, typed REST contracts and containerised CI/CD, plus the **.NET Core and Node.js** services behind them on **Azure**. I build **real-time interfaces** (WebSockets / SignalR notifications, chat and live dashboards) and **AI features** (streamed answers, an AI help assistant). I have worked in every Angular era, **AngularJS (1.x) → 8 → 14 → 16 → 21/22**, and modernise legacy code without stopping delivery, and I enjoy making learning fun through code. **Available worldwide**: remote, contract or relocation.

CORE SKILLS

Front-end & mobile
Angular (AngularJS → v22, Signals), TypeScript, JavaScript, HTML5, CSS3 / SCSS, React, Next.js, PrimeNG, React Native, Expo

State & real-time
RxJS, NgRx, NGXS, Redux, Signals state; WebSockets, SignalR, SSE: real-time notifications, chat, live dashboards, alert & tracking views

AI
Claude API streaming, AI help assistant with evaluation set, Claude Code, Cursor

Back end & platform
.NET Core / C#, Node.js, Go, RESTful APIs, SQL Server, PostgreSQL, Azure, Docker, CI/CD, Git

Quality & delivery
Unit + Playwright e2e tests, code review, WCAG, RTL, responsive & cross-browser, Agile / Scrum, full lifecycle to deployment

UI / UX design
Figma, Adobe XD: mockups and wireframes to production UI, design systems, bilingual HTML email templates

EXPERIENCE

UI/UX Design Intern · Anorix
Aug 2026 – Present

- UI/UX design internship at a software company focused on **UI/UX and product design**, UX consulting and SaaS platforms.

Senior Front-End & Full-Stack Developer · Saudi Azm (Azm Digital)
Nov 2023 – Present · Remote (Riyadh)

A Riyadh digital-government and fintech company, listed on the Saudi Nomu market.

- Own **end-to-end front-end architecture** for large government and fintech platforms, from Figma / Adobe XD to production, on shared component libraries and design tokens.
- Lead **legacy migrations to Angular v21/v22** (standalone, Signals), improving performance while features keep shipping.
- Introduced **Docker containerisation** for front-end projects, hardening CI/CD. Worked **full-stack on Insaf** (.NET Core and Node.js services, REST APIs); on every other Azm platform my role was front-end only.
- Deliver cross-platform features in **React Native**, sharing business logic with web; run technical reviews and sprint planning; bring AI-assisted workflows (Claude Code, Cursor) into delivery.

Wasl · Digital Financing Platform · وصل
Financing brokerage, Saudi Azm × National Housing Co. SAMA-licensed 2026. Front-end delivery only.

Saudi Bar Association · Complaints & Reports
National service with QC workflow. qccx.sba.gov.sa

Saudi Engineering Arbitration Center
E-arbitration portals for 4 user roles (Saudi Council of Engineers). Front-end only.

Contracts · Digital Contracts & e-Signature
Self-serve signing for individuals & companies. contracts.com.sa

Mirafh Portal ميراث
Front-end: built the Estates business module.

Front-End Web Developer · Tahaluf Al Emarat Technical Solutions
Jun 2023 – Nov 2023 · Amman

A UAE digital-transformation company: enterprise systems, AI and workflow automation for government.

- Built key modules (form & workflow designers) of a **low-code / no-code automation platform** in Angular 16 and PrimeNG; cut page load and memory, and **reported PrimeNG bugs upstream**.

Front-End Web Developer · Shepherd Technologies

Nov 2021 – Jun 2023 · Amman

A cloud human-capital-management vendor: time tracking, payroll, performance and e-learning.

- Worked across **three generations of the HR solution (AngularJS, Angular 8, Angular 14)**: features, fixes and performance.
- Delivered responsive **Payroll and Performance** single-page applications on REST APIs.
- Contributed to the **e-learning system** (course, enrolment and progress screens) and refactored legacy code for accessibility and speed.

AngularJS · Angular 8 · Angular 14 · REST · HCM · E-learning

Full-Stack Web Developer · PenguinIN

Nov 2020 – Nov 2021 · Amman

- Indoor-positioning company (PenNav, PenTrack). Owned an **indoor-navigation CMS** end to end: a map-heavy React + OpenLayers front end on Node.js / PostgreSQL services for venue, floor and POI management.

React · OpenLayers · Node.js · PostgreSQL

LIBRARIES, TOOLS & PRODUCTS

Sentinel Live · live demo · code
Real-time video-analytics dashboard: Angular 22 + RxJS over WebSockets: live camera tiles with tracking, alerts, charts, two-user chat and notifications.

Gigora · freelance marketplace
Angular 22 web + Expo app on ASP.NET Core 8 (CQRS); SignalR live notifications and workspace chat; AI help assistant.

Pelagic UI · oriebalzyuot96.github.io/pelagic-ui
Accessible component library for React, Vue, Angular, Svelte and React Native: 180+ components, 27 themes, RTL. npm i pelagic

Nawa Captcha · oriebalzyuot96.github.io/nawa-captcha
Self-hosted accessible puzzle CAPTCHA with audio; Node.js and ASP.NET Core. npm i nawa-captcha

Orcanix · oriebalzyuot96.github.io/orcanix-site
UI/UX design + code: Arabic-first admin and SaaS template with dashboards, apps and 3D landing pages in six frameworks.

Calm Plan · live demo
Wellbeing app: React on Pelagic UI, Node.js + SQLite, crisis-safe chat. Also 5min Refresh (SvelteKit game).

Orcanix · oriebalzyuot96.github.io/orcanix-site
UI/UX design + code: Arabic-first admin and SaaS template with dashboards, apps and 3D landing pages in six frameworks.

Chatbot Kit · github.com/oriebalzyuot96/chatbot-kit
Web-component chat; Node back end streams Claude API answers with rate limits.

Dada دادة · my own business (owner): website + app, launching · Behance case study
Childcare finder for Jordan on one map. Also on Behance: Matjari UI/UX case study.

Developer tools (MIT, open source) · oriebalzyuot96.github.io/work/#tools
arabic-ui-audit, a11y-pr-diff, flow-tests, har-verify, har-mock-api, token-sync, bundle-explainer and more; plus 8 private tools.

SELECTED OPEN SOURCE & PROJECTS

- **Mozilla pdf.js #20306**: isolated an iPhone 15 Pro rendering regression (resolved).
- **PrimeNG #13468, #13479**: ContextMenu model override and Dialog drag regressions (resolved).
- **PrimeNG #13506**: proposed lazy loading for Dropdown virtual scroll.
- **Bareeq Al-Aeeq**: interior-design brand: Angular 21 (Signals) site with booking, client portal and an Expo app on shared tokens.
- **Personal portfolio**: **Astro**, bilingual EN/AR (RTL), accessibility panel and command palette. oriebalzyuot96.github.io

EDUCATION & CERTIFICATIONS

B.Sc. Communication & Software Engineering · Al-Balqa Applied University

2014 – 2018

- GPA **3.58 / 4.00**, **ranked 2nd in class**; top marks in electrical, maths and physics courses, and high marks at school. **Private tutor** alongside my studies.

Full-Stack Web Development Intensive · Hack Reactor curriculum

Mar – Aug 2020 · 12 weeks

- **LinkedIn verified skills:** Angular, React.js, Node.js, JavaScript, TypeScript, Git, Agile. **Languages:** Arabic (native), English (professional).
