PROFILE

Senior Front-End Engineer with **6+ years** building **government, fintech, HR and enterprise products** that people rely on. I own front-end architecture end to end: design systems and tokens, **Signals-based Angular**, typed API contracts and containerised CI/CD. I also build the **.NET Core and Node.js** services behind them on **Azure**. I have worked in every Angular era, **AngularJS (1.x) → 8 → 14 → 16 → 21/22**, and modernise legacy codebases without stopping delivery. What drives me is seeing a product **succeed because it genuinely helps people**, so I build accessible (WCAG), **Arabic-first RTL** and fast interfaces. **Available worldwide**: remote, contract or relocation.

CORE SKILLS

Front-end architecture
Angular (AngularJS → v22, Signals, standalone, RxJS), TypeScript, React, Next.js, Astro, Svelte, PrimeNG, design systems & tokens

Mobile
React Native, Expo, shared web/mobile logic and theming

Back end & data
.NET Core / C#, Node.js / Express, REST & microservices, PostgreSQL, MongoDB, SQL

Platform
Microsoft Azure, Docker, CI/CD pipelines, Git

Quality
WCAG accessibility, Arabic RTL & i18n, performance tuning, unit testing, application security, code review

Delivery & tools
Agile / Scrum (Jira), Figma, Adobe XD, Claude Code, Cursor (AI-assisted engineering)

EXPERIENCE

Senior Front-End & Full-Stack Developer · Saudi Azm (Azm Digital)

Nov 2023 – Present · Remote (Riyadh)

A Riyadh digital-government and fintech company, listed on the Saudi Nomu market.

- Own **end-to-end front-end architecture** for large government and fintech platforms, from Figma / Adobe XD to production, on shared component libraries and design tokens.
- Lead **migrations of legacy applications to Angular v21/v22** (standalone components, Signals), improving rendering performance and maintainability while features keep shipping.
- Introduced **Docker containerisation** for front-end projects, standardising environments and hardening CI/CD.
- Build and scale **.NET Core and Node.js microservices on Azure**; design REST contracts and PostgreSQL integrations for transaction-heavy flows.
- Deliver cross-platform features in **React Native**, sharing business logic with web; run technical reviews and sprint planning; bring AI-assisted workflows (Claude Code, Cursor) into delivery.

Wasl · Digital Financing Platform · وصل
Financing brokerage, Saudi Azm × National Housing Co. SAMA-licensed 2026. Front-end delivery only.

Saudi Bar Association · Complaints & Reports
National service with QC workflow. qccx.sba.gov.sa

Saudi Engineering Arbitration Center
E-arbitration portals for 4 user roles (Saudi Council of Engineers).

Contracts · Digital Contracts & e-Signature
Self-serve signing for individuals & companies. contracts.com.sa

Mirafh Portal مرافه
Enterprise portal on a web + mobile design system.

Front-End Web Developer · Tahaluf Al Emarat Technical Solutions

Jun 2023 – Nov 2023 · Amman

A UAE digital-transformation company: enterprise systems, AI and workflow automation for government.

- Built key modules (form & workflow designers) of a **low-code / no-code business automation platform** in Angular 16 and PrimeNG.
- Reduced initial page load and memory overhead, resolved UI integration defects, and **reported PrimeNG bugs upstream** with reproducers.

Front-End Web Developer · Shepherd Technologies

Nov 2021 – Jun 2023 · Amman

A cloud human-capital-management vendor: time tracking, payroll, performance and e-learning.

- Worked across **three generations of the HR solution: AngularJS (1.x), Angular 8 and Angular 14**, shipping **new features, bug fixes and performance improvements**.
- Delivered responsive **Payroll and Performance** single-page applications on REST APIs.
- Contributed to the **e-learning system**: course, enrolment and learner-progress screens alongside the HR suite.
- Refactored legacy front-end code for accessibility, maintainability and execution speed.

AngularJS · Angular 8 · Angular 14 · REST · HCM · E-learning

Full-Stack Web Developer · PenguinIN

Nov 2020 – Nov 2021 · Amman

An indoor positioning company (PenNav, PenTrack) serving healthcare, education and retail venues.

- Owned an **indoor-navigation CMS** end to end: a map-heavy React + OpenLayers front end on Node.js / PostgreSQL services for venue, floor and POI management.

React · OpenLayers · Node.js · PostgreSQL

SELECTED OPEN SOURCE & PROJECTS

- **Mozilla pdf.js #20306**: isolated an iPhone 15 Pro rendering regression after the 5.4 upgrade (resolved).
- **PrimeNG #13468, #13479**: ContextMenu model override and Dialog drag regressions (resolved).
- **PrimeNG #13506**: proposed server-side lazy loading for Dropdown virtual scroll.
- **Bareeq Al-Aeeq**: luxury interior-design brand: Angular 21 (Signals) marketing site with consultation booking, client portal, and Expo mobile app on shared design tokens.
- **Personal portfolio**: built with **Astro**, static bilingual pages (EN/AR, RTL), WCAG-minded, with an accessibility panel, command palette and synthesised UI sound. oriebalzyuot96.github.io

EDUCATION & CERTIFICATIONS

B.Sc. Communication & Software Engineering · Al-Balqa Applied University

2014 – 2018

- GPA **3.58 / 4.00**, **ranked 2nd in class**.

Full-Stack Web Development Intensive · Hack Reactor curriculum

Mar – Aug 2020

- 12-week immersive software engineering program: JavaScript, Node.js, React, data structures.

- **LinkedIn verified skills:** Angular, React.js, Node.js, JavaScript, TypeScript, Git, Agile methodologies.

LANGUAGES

Arabic: native · **English**: professional working proficiency

WHAT I BRING TO A TEAM

- **Architecture you can scale:** boundaries, contracts and tokens before pixels.
- **Safe modernisation:** legacy Angular to v21 without freezing the roadmap.
- **Human-first quality:** accessibility, native RTL and honest error states.
- **Ownership:** from Figma to production and after it, through review, CI/CD and support.
